

Company protection and hygiene concept as part of the SARS-CoV-2 pandemic prevention

Status: 08.01.2021

The safety and health protection of our customers and employees is always very important to us. We therefore take additional precautions to protect against infection with SARS-CoV-2 and to help slow down the spread of the corona virus.

The protection and hygiene concept created for the German locations of the Reinhausen Group is described below in an overview:

Fundamental measures:

- Implementation of a crisis management team for operational pandemic planning
- Implementation of various measures to comply with the minimum distance of 1.5 m
- Provision of mouth-and-nose cover and additional PPE in the event of operationally necessary distances below the minimum distance
- Instructions for the infected; Contact persons and in suspected cases
- Implementation of the SARS-CoV-2 occupational safety regulations of the BMAS

Further measures:

- Creation of additional possibilities for hand hygiene
- Control and regulation of customer and employee traffic
- Regulation and detailed recording of access to the premises and workplaces by external persons
- adapting workplace design and extending mobile working
- Reduction of business trips and meetings / alternative use of digital media
- Adjustment of working and break times to reduce contact opportunities
- Adaptation of the conditions of use of sanitary facilities, canteens and break rooms
- Instruction of employees and active communication of additional measures taken
- Introduce further health and safety measures
