

Proven measures to protect against infectious diseases (including SARS-CoV-2)

– Behavioral Advice for Visitors and service providers –

Dear visitors,

the safety and health protection of everyone on our factory premises is always very important to us.

Therefore, regardless of Corona, we ask you to continue to observe the following behavioral instructions and hygiene measures to protect against infectious diseases.

General rules of conduct	
	<p>Observe the known hygiene rules.</p> <p>Wash your hands thoroughly with soap several times a day.</p> <p>Don't touch your face with your hands.</p>
	<p>Observe the cough and sneeze etiquette.</p> <p>Cough or sneeze into the crook of your arm, not into your hand.</p> <p>In this way, you protect those around you from infection.</p>
	<p>We very much welcome it if you continue to wear a mask in unclear situations (e.g. after contact with sick persons, unknown own state of health). You are welcome to ask your contacts to wear a mask as well.</p>
	<p>Test kits for a rapid SARS-CoV-2 antigen test are available at reception.</p> <p>Please feel free to take advantage of this offer.</p> <p>Corona infections can thus be detected at an early stage.</p>
Behavior in case of infection	
	<p>In case of infection, please postpone or cancel your visit.</p> <p>We will be happy to welcome you after your full recovery.</p>
