THE NEXT LEVEL FOR YOUR ASSET MANAGEMENT

TESSA® APM enables you to perform predictive maintenance of your transformers. We combine your offline and online transformer data and, with the help of analyses and artificial intelligence, derive a concrete status of your transformers and present it in a comprehensible and comparable way. With the help of a high-performance database, you have insight into historical and current trends and receive concrete recommendations for action.

CORE MODULES

- **CONDITION ASSESSMENT (HEALTH INDEX)**
  - Reliable evaluation standards and trends

- **TESSA® FLEETSCAN 2D**
  - Expert condition assessment (offline data)

- **TESSA® FLEET MONITORING**
  - 24/7 online monitoring of relevant assets

- **ASSET INTELLIGENCE**
  - Automated fault diagnosis and recommendations

- **OIL DIAGNOSIS**
  - In depth analysis, trending and overviews

- **SERVICE MONITOR**
  - All your OLTCs at a glance

- **ASSET RANKING**
  - Compare the overall health in your fleet

YOUR BENEFITS

- + Reliability against unplanned outages
- + Reduction of OPEX
- + Extension of asset life
- + Clear recommendations
