Regensburg, 28.02.2022

## **Replacement of on-load tap-changer variants VACUTAP® VRF I 1601 and 1801 with VACUTAP® VRL®**

Dear Customer,

Since the introduction of the on-load tap-changer VACUTAP® VR® with vacuum technology in 2004, MR has offered the ideal alternative to classic oil technology.

In May 2018, we informed you about the replacement of the VACUTAP® VR® product family (2004-2020) by the further development VACUTAP® VR® Next Generation.

In the meantime, the on-load tap-changers of the next generation have proven themselves thousands of times in use. They offer maximum safety and economy and also set new standards in reliability.

With the introduction of the new VACUTAP® VRL I 1801, a high-performance successor is now also available for the VACUTAP® VRF I 1601 and 1801 variants of the first generation VACUTAP® VR®.

**Convince yourself of the advantages  
of the world's most powerful  
vacuum on-load tap-changer!**

**VACUTAP® VRL®**

**We will therefore discontinue the on-load tap-changers VACUTAP® VRF I 1601 and 1801 and after a transitional period, series production will end on December 31, 2022.**

Existing projects and contracts for which we have already issued written commitments and guaranteed delivery beyond the stated date will of course remain valid.

However, we ask you to already use the VACUTAP® VRL® in all future project planning.

It goes without saying that we will continue to be available to you in the future with our competent after-sales service (spare parts, repairs, support) for all products placed on the market by us.

Please also forward this information to other relevant departments within your company. We thank you for the confidence you have placed in us and our products and look forward to our continued cooperation.

If you have any questions in connection with this discontinuation, please feel free to contact our sales team at any time.

With kind regards  
Maschinenfabrik Reinhausen GmbH
