

ETOS® & Remote Solutions

Commissioning support

Commissioning support.

The digitalization of technology in the energy sector is progressing steadily. With ETOS®, MR supplies numerous key technologies.

Integrating a digital transformer into an existing power grid and fully utilizing the potential of digitalization requires the expertise of specialists. Especially in times of high demand and restricted supply chains, innovative solutions are needed to save time and costs.

With our new Remote Solutions, we support you remotely with the commissioning of our products – worldwide and exactly when you need us.

 Remote support at transformer factory	 Remote support at site
	 Remote installation and commissioning 3 h
	 Remote installation and commissioning 7 h
	 Alternative On-site installation and commissioning

Your advantages

Expert know-how
