

OILTAP® upgrade with state-of-the-art VACUTAP® technology

Oil on-load tap-changers come with a range of maintenance costs caused by oil carbonization, the replacement of contacts and oil filter systems that run concurrently with the tap changers. These problems are a thing of the past. By replacing your OILTAP® diverter switch insert with a environmentally friendly VACUTAP® one, your maintenance costs are significantly reduced.

Your upgrade possibilities:

OILTAP® M → VACUTAP® VM®

OILTAP® R* → VACUTAP® VR®

License products on request

*) Three phase, neutral point, other types on request

Your advantages:

- ✚ Maintenance-free in most network applications (interval of 300.000 switching operations)
- ✚ Enhanced transformer availability
- ✚ Short payback period for industrial applications
- ✚ Reduced costs by less maintenance
- ✚ Ecologically friendly due to fewer oil changes
- ✚ Plug and play in one day
