

VIBRO-ACOUSTIC DIAGNOSTICS FOR ON-LOAD TAP-CHANGERS.

The condition of the on-load tap-changer is essential for the reliable operation of the transformer. Our innovative vibro-acoustic measurement system provides you with conclusive data for evaluating the condition of your on-load tap-changer. Based on our recommendations for action, you can avoid breakdowns, optimize the planning of your maintenance measures and ensure safe operation.

YOUR CHALLENGE

-  Evaluating the condition of an on-load tap-changer requires specific expertise
-  High demand on the availability of the transformer and avoidance of unplanned outages
-  Optimizing your maintenance strategy requires detailed information about the condition of your on-load tap-changer

OUR SOLUTION

-  Precise vibro-acoustic measurement and diagnostics by MR on site
-  Flexible measurement on the transformer both in and out of operation
-  Innovative algorithm for condition evaluation combined with unique on-load tap-changer expertise
-  Clear recommendations for action for optimizing your maintenance strategy

HOW TESSA® VAM WORKS:

YOUR BENEFITS:

- No transformer outages necessary
- Measurement and diagnostics with special measurement devices done by MR experts
- Vibro-acoustic fingerprint as a reference for the future detection of on-load tap-changer wear and aging
- Decades of experience in servicing on-load tap-changers
- Can be combined with other services on the transformer

CLIENT-FOCUSED SOLUTIONS

For optimal performance throughout the entire transformer lifetime.

6,000+ service assignments per year, worldwide

100+ years of experience in the design of key transformer components

280 qualified service technicians

5 certified training centers

24/7 availability

60+ years of service history

24 months of guarantee on our services
