Discontinuation of On Load Tap Changer type OILTAP® M

Dear Customer,

In recent years, our product structure has changed considerably due to the introduction of the VACUTAP® VM® in the year 2011. Many customers have already changed to the VACUTAP® VM®, as it offers many advantages for its users. This change has led to a steady decrease in the total production quantity of OILTAP® M.

Against this background, we will remove the on-load tap-changer family OILTAP® M from our product range; series production will end on 31.12.2020.

Existing projects and contracts for which we have already made written commitments including deliveries beyond the above-mentioned date remain valid.

For all further series deliveries from January 2021, the established product family VACUTAP® VM® will be applied.

As part of our after sales service, we will of course continue to provide spare parts, repair services and our competent technical support beyond the date of discontinuation.

Please also forward this information to other affected departments within your company.

We thank you for the trust you have placed in our products and us and look forward to continuing our cooperation with you. Our sales team will be happy to answer any questions you may have about the discontinuation products and last orders.

With kind regards

Maschinenfabrik Reinhausen GmbH
